

PRIORITY PRODUCT | OVERSEAS B2B

MEK-01s

Odor-focused initial treatment and project entry.

PRODUCT SNAPSHOT

ROLE

Odor-focused initial treatment and project entry.

CURRENT FORM

Neutral powder; pH 6.8 in current catalog information.

POTENTIAL SETTINGS

Hotels, washrooms, shared spaces and managed facilities.

Before the first test

- What is the odor source and affected area?
- Which ventilation, humidity and operating conditions apply?
- How will the customer judge the first result?

A PRACTICAL ROUTE

1. Share the use case
2. Technical and site review
3. Sample or limited validation
4. Review before commercial scale

Actual results vary with odor source, environment, preparation, application method and observation conditions. Claims must be matched to supporting data and local requirements.
